CAREER OBJECTIVE

Final-year Information Science and Engineering student with a strong interest in Artificial Intelligence, Machine Learning, and Software Development. Hands-on experience in developing AI/ML-based academic projects and web applications using Python, React, and modern development tools. Seeking an internship opportunity to apply technical knowledge, gain industry experience, and contribute to real-world technology projects.

EDUCATION

Bachelor of Engineering in Information Science and Engineering

East West Institute of Technology, Bengaluru
Expected Graduation: 2027 | CGPA: 8.2/10 up to 3rd Year

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript (Basic)
AI & Machine Learning: NumPy, Pandas, Matplotlib, Scikit-learn, TensorFlow, PyTorch, Hugging Face
Generative AI: OpenAI API, Large Language Models (LLMs), Prompt Engineering
Web Technologies: HTML, CSS, JavaScript, React, Node.js
Databases: MySQL, MongoDB, SQLite
Developer Tools: Git, GitHub, Visual Studio Code

PROJECTS

AI Smart Surplus Medicine Redistribution System | Final-Year Major Project — Ongoing

- Leading the development of an AI-powered system designed to reduce medicine wastage through intelligent surplus medicine redistribution.
- Contributed to project ideation, planning, and system feature design.
- Working on AI/ML components for smart medicine demand analysis and redistribution recommendations.
- Contributing to frontend development for an interactive and user-friendly system interface.
- Coordinating team activities, project planning, and task execution as Team Lead.
- Responsible for project presentations and communicating the proposed system architecture and objectives.

AI-Based Brute Force Attack Detection System | College Mini Project

- Developed a machine learning-based system to identify suspicious login attempts and potential brute-force attacks.
- Used Python and machine learning techniques for login-attempt analysis and anomaly detection.
- Developed application functionality using Flask and managed user and login data using SQLite.
- Focused on detecting abnormal authentication patterns to improve system security.

LEADERSHIP & ACTIVITIES

Event Coordinator — Ideathon, East West Institute of Technology: Coordinated event activities and supported the organization and execution of the college ideathon.

Smart India Hackathon (SIH): Participated in the national-level innovation and problem-solving hackathon.

GDG AI Workshop: Attended an AI-focused technical workshop covering modern artificial intelligence concepts and technologies.

MSME Entrepreneurship Awareness Programme: Participated in an entrepreneurship awareness programme focused on innovation and business development.
